---

Another George White complaint against the ALP program in Kalamazoo Public Schools.

I really think we need an on-site investigation looking at this systemically as we do not have enough case managers to take these on one by one as he files them....

The issue here is he believes the district is placing general education students into this program due to behavior without regard to child find and potential discipline protections as not yet eligible students. So far, the corrective action for 1 final decision has resulted in the order for an initial evaluation and at the end of it the IEP Team did determine eligibility. Not sure how many others will pan out that way, but.....
